P.O. Box 40888
San Francisco, CA
94140

This is the second of two listings of New Jersey Food Stamp Change tokens. The first appeared in The Token and Medal Society Journal in December, 1979, on page 238. In this publication I have continued to use a "checklist" format with brackets (), and which provides collectors an opportunity to note the presence of tokens in their collections. A total of forty-three obverse design sets were listed in Part 1 and eighty-four are included this time. The major and some minor obverse types used by these stores are included. Legends which bear no indication of place have been definitely attributed by me to the locale under which they are listed. All tokens are of the Plasco or Personalized Plastics type. Unless otherwise mentioned they are 28mm in diameter and most commonly are found without raised rims. Also see Part 1 for additional information. Thanks go to Jerry Zara of Bricktown, New Jersey, for his information and help and the use of his tokens for Xeroxing.
